ABOUT ME

I am a 20 year old Student in my 2nd year at bachelor's degree program in software engineering at Sami Shimon College Ashdod. I did a matriculation. 10 units of computer science and software engineering, 5 units physics, 5 math and 5 english. Has extensive knowledge in software engineering and programming.

GOALS

Looking for a student job in the field of computers, data systems. Responsible, curious, can learn alone and on a team, open to tackling new tasks and challenges and develop in the field.

EXPERIENCE

Aloniel Ltd, Gedera — *Shift Manager*

May 2018 - May 2021

Skills I acquired at work:

- Managing a team under pressure and during a lot of work.

- Adherence to schedule and working hours.

- Communication with customers.

Cyber Education Center, Ashdod — *Advanced Programming Instructor*

August 2022 - Today

Skills I acquired at work:

- Teaching a group of students on in-depth topics in programming.

- More in-depth knowledge of programming.

- Cyber experience.

- Working on a programming project as a team using Git.

- New teaching skills.

- Testing and finding bugs in advanced software projects.

2010 - 2013
My family and I were on an errand in India on behalf of the Ministry of Defense which asked my father to move there for a period of 3 years.

Reut Elementary School, Gedera — *First and Second grade*

2009 - 2010

PROJECTS

Software Engineering Final Project — *95*

We were asked to develop software that includes a short game and an information management system that is stored on the server.

Algorithmic exercise book with questions and answers - *a work in progress*

After several years in the field, I was looking for something that would give me a thrill and also help me continue to learn, improve, stay up to date and get rid of rust. That's why I decided to create this file.

VOLUNTEERING

Gedera FLL Group — *Mentoring*
August 2017 - June 2019

I volunteered for the Gedera group in the FLL competition, a robotics competition all over the world. I acted as a mentor and instructor for seventh- through ninth-graders in the development of the robot and their project.

I was exempted from military service
August 2020 - December 2020

After 4 months of service in the IAF, the IDF dismissed me for medical reasons.
